

“Whatever you do, work at it with all your heart.”

Colossians 3:23

# Year 3 –Spring 2

## Curriculum Overview

**English** - We practise writing skills daily and take our ideas from rich and varied texts including poetry and non-fiction. We continue to learn to write for different audiences and for different purpose. We aim to include as much ‘writing choice’ as possible. This half term our writing links with our History topic.

**Maths** – Please see our school website for more detail.

**Computing**— We continue to learn how to keep safe whilst in line by looking at child-friendly search engines. We are going to learn how to access and use Word efficiently. Internet safety underpins all that we do.

**RE**— We continue to learn and enrich our understanding of the Sanatana Dharma faith. As we explore this world faith, we also learn about tolerance, respect and compassion.

**Reading**—Through our quality Reading lessons, we enjoy a wide variety of text types and always read aloud together, working on our fluency. Every lesson allows children the opportunity to show a clear understanding of the text they have read.

**P.E**- All children take part in lively, engaging, weekly PE lessons to develop their skills in Gymnastics, Net and Wall, Striking and Fielding, Flag Football and Movement and Athletics. This will be done through a variety of activities, including ball skills and co-operative games.

**French**— We will be learning to ask and answer simple questions by recalling words and phrases. Our focus will be dates and birthdays this half term.

**P.S.H.E**— Our weekly PSHE lessons this half term help us to learn how to keep ourselves safe. We explore our thoughts and feelings with respect to our friends, families and communities.

**Music**— We are learning how to play and enjoy the wonderful sounds of the steel pans by developing a wide variety of rhythmic patterns.

**Science:** Our topic is The Skeletal System. We will learn about what food we need to eat to keep healthy and what the main jobs of our skeletal system are.

**Design and Technology:** We will be designing and making an egg cosy using needlework skills.

**History:** - We are beginning to learn about The Celts and the impact they had in Britain. Our learning will be enriched by our class visits to The Ancient Technology Centre.
